

Invest In Your Future And Prepare For Medical, PA, Pharmacy, or Nursing School With a **Patient Care Technician (CPCT) Certification!**

WHY CHOOSE PATIENT CARE TECHNICIAN?

As a Certified Patient Care Technician (CPCT), you'll play an integral role in the healthcare team as you provide diverse patient care duties in collaboration with physicians, nurses, PAs, NPs, and other healthcare professionals while preparing for PA, medical, or nursing school.

Patient Care Technicians are one of the fastest-growing roles in healthcare today! PCTs generally work in the hospital, intensive care unit, emergency room, cardiac care unit, rehabilitation facilities, and nursing homes. They usually work closely with the nursing staff to deliver patient care through various responsibilities, including obtaining vital signs, collecting laboratory specimens, conducting ECGs, transporting patients and assisting with ambulation, administering medications, etc.

This fully online certified [patient care technician training and certification course](#) is an 8-week self-paced program ideal for health science students seeking patient care experience in hospital, emergency room, treatment & rehab centers prior to starting/ applying to nursing, physician assistant (PA), or medical school.

Teri Berry, DNP, FNP-C

Senior Course Instructor

Dr. Teri Berry received her Bachelor of Science in Nursing from Southern Illinois University, Master's in Nursing Management Administration from McKendree University, and Post Master's FNP and Doctor of Nursing Practice degrees from Indiana State University. She is a Family Nurse Practitioner and has worked in various healthcare environments including hospitals, private practice, home health, managed care, and telehealth. After obtaining her DNP she has focused her career on developing higher education course curricula and student education opportunities. Dr. Berry is passionate about mentoring, supporting, and engaging students currently working and pursuing goals within the healthcare environment. She is committed to supporting and guiding students throughout their learning experience.
